DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a high temperature super-conducting cable, classified in class 174, subclass 15.4.
 - II. Claims 18-20, drawn to a process for manufacturing high temperature super-conducting cable, classified in class 29, subclass 599.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, a super-conducting cable can be made by different process such as: deposit the super-conduction material in desired location and deposit the metal strip and contact with the super-conductor instead of using the method enclosing a super-conductive material in a metal covering to form super-conductive tape; and spirally winding a super-conducting tapes onto the support to form a super-conducting layer.

3. A telephone call was made to Ernest F. Chapman on 6/11/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2841

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
